

Technician cover letter model

Victor Totor
Company XXX
Director of Human Resources
9898 Tata St.
Halifax, NS T8T 9T9

Dear Mr. Totor:

I would like to apply for the electrical engineering technician job that you advertised on techjobs.ca.

I am currently an electrical engineering technician with Electrizz, specializing in industrial electrical resistance and project management. I have held positions of increasing responsibility in my work. Over my ten years of experience, I have honed my teamwork skills and ability to adapt.

The use of my technical skills on a daily basis has given me a solid scientific background, which I would like to harness for your group and its projects.

I have the required qualifications and motivation to manage and cost major projects. With my licence for heavy and regular loads, I can easily travel to facilitate the implementation of projects I am responsible for.

I am available to meet with you to discuss my suitability and motivation for this position.

Yours truly,

[signed]
